

Cisco CPAK-100GE-LR4 Datasheet

Cisco CPAK-100GE-LR4 100GBASE-LR4 CPAK Module for SMF (terminated with LC Connectors)

CPAK-100GE-LR4

Cisco CPAK 100GBASE fiber modules for Cisco switches and routers offer a selection of high-density 100-Gbps connectivity solutions. The modules are especially well suited for connections in enterprise and service provider data centers and in service provider edge networks.

The line cards use the Cisco CPAK form factor. They are 20 percent smaller and consume 40 percent less power than C Form-Factor Pluggable 2 (CFP2) modules; they use 70 percent less power than the CFP interface. Cisco CPAK modules give you up to 20 percent greater port density and front-panel bandwidth than competing products.

Choose the model that matches the distance you need to cover, the type of fiber cabling you are using, and the Cisco networking product you are using. Cisco CPAK 100GBASE modules work in the following Cisco networking equipment: ASR 1000 Series Router; ASR 9000 Series Router; CRS-X Carrier Routing System; NCS 2000, 4000, and 6000 Series Routers; the Nexus 7000 and 7700 Series Switches, and the Cisco ONS Transport Platform.

Features and benefits

Cisco CPAK modules combine high density and bandwidth with low power consumption and are interoperable with any IEEE-compliant 100GBASE-LR4 or 100GBASE-SR10 for investment protection and product choice. Some models, including the Cisco CPAK 100GBASE-LR4, use Cisco Complementary Metal-Oxide Semiconductor (CMOS) photonic technology to provide industry-leading optical integration, performance, power savings, and scalability.

Cisco CPAK 100GBASE-LR4 Module

The primary application of the Cisco CPAK-100G-LR4 and CPAK-100GE-LR4 modules is to support 100Gbps optical links over standard Single-Mode Fiber (SMF, G.652) terminated with SC connectors or LC connectors.

The LR4 module is IEEE 802.3ba-compliant and supports link lengths of up to 10 km over standard SMF, G.652. It delivers an aggregate data signal of 100 Gbps, carried over four LAN Wavelength-Division Multiplexing (WDM) wavelengths operating at a nominal 25 Gbps per lane. Optical multiplexing and demultiplexing of the four wavelengths are managed within the module.

Specifications

- Product Number: CPAK-100GE-LR4
- Description: Cisco CPAK-100GE-LR4 100GBASE-LR4 CPAK Module for SMF (terminated with LC Connectors)
- Connector: Dual LC/PC connector
- Wavelength: 1310nm
- Cable Type: SMF Duplex

- Cable Distance: 10km
- Transmit Power (dBm):
 - Maximum: 4.5 per lane
 - Minimum: -4.3 per lane
- Receive Power (dBm):
 - Maximum: 4.5 per lane
 - Minimum: -10.6 per lane
- Transmit and Receive Center Wavelength Range (nm): Four lanes:
 - 1294.53 to 1296.59
 - 1299.02 to 1301.09
 - 1303.54 to 1305.63
 - 1308.09 to 1310.19

Dimensions

- Maximum outer dimensions for the Cisco CPAK-100GE-LR4 module (H x W x D): 11.6 x 34.8 x 101.2 mm (0.46 x 1.37 x 3.98 in).
- The Cisco CPAK modules typically weigh approximately 127 grams (4.48 oz.).

Environmental conditions and power requirements

- Operating temperature range: 0 to 70° C (32 to 158° F)
- Storage temperature range: -40 to 85° C (-40 to 185° F)
- CPAK-100GE-LR4 power consumption at 70° C:
