## D-Link DEM-423XT Datasheet

D-Link DEM-423XT 10.5 Gbps 10GBASE-ER 1550nm Single Mode 40km XFP Transceiver DEM-423XT

D-Link DEM-423XT 10.5 Gbps 10GBASE-ER 1550nm Single Mode 40km XFP Transceiver

D-Link's 10G XFP Module series are hot-swappable transceivers that plug into XFP slots on switches and support 10G Ethernet. This transceiver provides high-speed operation and physical compactness to deliver the speed, reliable long-distance data transfer, and deployment flexibility that today's fiber networks require. The D-Link 10GBase XFP Module Series transceivers offer customers a wide variety of 10G Ethernet connectivity options for data centers, enterprise wiring closets, and service provider transport applications. The DEM-423XT transceiver operates with +3.3V and +5V power supply.

The DEM-423XT transceiver uses standard duplex LC connector for fiber cable connection. It conforms to industry standards and is interoperable with D-Link 10 Gigabit switches. All D-Link transceivers are hot-pluggable. Hot-swap capability allows network administrators to plug or unplug it from the XFP slot without having to turn off the power of the connected device.
